

Established 1971

The 50th Anniversary Meeting of the EHR will take place from 1st to 3rd September, 2022 in Hannover, Germany

Congress Venue Leibnizhaus

The 50th Annual EHR Meeting is organized in collaboration with the DGAKI (German Society for Allergy and Clinical Immunology) and will take place from 1st to 3rd September, 2022 in the Leibnizhaus in Hannover, Germany - after the long virtual time now in presence again!

The EHR is a non-profit association of scientists and clinicians who are interested in the biology and medical implications of histamine-mediated effects as well as the diverse effects through its four specific receptor subtypes. The role of histamine in immunomodulation, in allergy, in atopic diseases, and in cancer, its function in the nervous system as well as the pharmacology of the molecule will be addressed in particular at this conference. International experts will report on actual developments in histamine research and discuss novel data with the participants. There will be sufficient time and room for networking between the lectures, during the poster sessions and during the accompanying program including an opening ceremony, a walking tour through the historic part of Hannover and a Gala Dinner. Hannover is a famous international congress city and well reachable by all transport systems.

We look forward to welcoming all of you this September in Hannover/Germany for the 50th Annual Meeting of the EHR. Best wishes,

Thomas Werfel and Holger Stark for the Organizing Committee

Overview of the preliminary program of the 50th Annual EHR Meeting from 1st to 3rd September, 2022 in Hannover

Thursday September 1st

GB West lecture

Prof. Wolfgang Bäumer, Berlin, Germany:

Histamine in atopic dermatitis (AD), particularly in animal models of AD

Clinical lecture

Prof. Thomas Werfel, Hannover, Germany:

Novel treatments in atopic dermatitis – beyond histamine

Scientific lectures (I): Molecular Pharmacology

Opening Ceremony

Come together and a walk through the dark alleys of the Old Town of Hannover

Friday September 2nd

Scientific lectures (II): Histamine and nervous functions, histamine in diseases including cancer

Invited lectures

Prof. Wiesława Agnieszka Fogel, Łódź, Poland:

Multitarget drugs directed to histamine and biogenic amines system in neurodegenerative diseases

Prof. Rob Leurs, Amsterdam, The Netherlands:

New tools for histamine receptor research

Honorary EHR Membership Ceremony; Young Investigator Award Gala Dinner

Saturday September 3rd

Invited lecture

Prof. Detlef Neumann, Hannover, Germany:

Histamine and intestinal diseases

Scientific lectures (III): Histamine in Allergy and Inflammation

EHR General Assembly and Election of new President & Council Members

The Organizing Committee welcomes the submission of scientific contributions! All scientific abstracts will be published in *Inflammation Research*. Please send your abstract as an e-mail attachment to Neumann.Detlef@mh-hannover.de

Abstract Submission Deadline extended until: 08th July, 2022
